

UvoScreen Elite™

A HIGH PERFORMANCE UV SCREEN INK FOR SELF ADHESIVE SYNTHETIC SUBSTRATES

UvoScreen Elite[™]

can be used in all rotary screen units (SCREENY and STORK) and fast running flatbed presses, provided the ink is cured (exposed to UV light).

Suitable for a wide variety of applications

- Self adhesive labels PE, PP, Primax, FasClear, uncoated & coated papers, boards, cast coated papers, top coated PE & PP and PVC.
- Can be overprinted with UV letterpress, UV offset and UV flexo (additive needed).
- Is suited for hot foil blocking.
- Full range of Pantone® basic colours available.

PROPERTIES	BENEFITS
Enhanced colour consistency and excellent pure shades	Improved print result and profitability
Excellent adhesion on a wide range of substrates	Meets a wide range of final product demands
Low silicone content	 Excellent overprintability with UV letterpress, UV offset and UV flexo
Great dot sharpness, but still excellent flow with white and colours	Best print quality obtainable with UV screen
VOC free and user-friendly raw materials	Environmentally friendly
Excellent cure properties	Improved productivity, high print speeds possible
Tailored rheology and low viscosity	 Easy to handle, manages a wider range of press speeds

UvoScreen Elite™

Availability

• Full range of Pantone® basic colours

The information contained in this brief product presentation is based on long experience of Flint Group Narrow Web and on internal standardised tests. It is not to be interpreted as a warranty or guarantee in any form as conditions beyond our control can affect the quality of the printing. If there is any doubt, the user should always make every effort to ensure that the products used are appropriate for the purpose.
