

Varn Silverfount

Fount solution

Varn Silverfount has been designed to work with a wide range of plates, but especially with direct image plates.

Varn Silverfount is designed to fit into the office and inplant environment as it does not contain any harmful or toxic chemicals and operates without odour.

Varn Silverfount will keep plates cleaner over longer runs, so you will experience the same trouble-free running that Varn's sophisticated fountain solutions give to the larger press user.

Varn Silverfount will desensitise the non-print area and keep it clean from emulsion.

Varn Silverfount can also be used as a plate etch in its concentrated form.

Varn Silverfount is available as a concentrate or ready mixed.

Features	Advantages	Benefits	Product Benefits
Universal.	Versatile application. Can be used with a variety of plates. Suitable for all types of water.	One product for all applications. Single fountain solution application.	<ul style="list-style-type: none"> • For use on direct image plates. • For use in conventional and integrated dampening systems. • For use with oil and rubber based inks. • One complete product, no need for extra additives.
