Varn[®] Newsline 388 Fount

Robust Biocide and Plate-protection Package
Developed in Harmony With Our Flint Group Coldset Inks

Fountain Solution: Neutral

Varn[®] Newsline 388's robust wetting package allows for lower water settings, which is preferable for all paper stocks used in coldset print applications. The product also offers a wide operating window, which improves plate clean-up at low-end water settings, and provides an excellent ink-and-fountain-solution balance. In addition, Varn Newsline 388 fountain solution's enhanced biocide package reduces the potential for microbial growth.

Advantages of Varn[®] Newsline 388 Fount

- Compatible with all coldset inks. Optimized results with Flint Group's ArwlithTM ink system
- Designed for black and color inks
- Can be used with no-chemical process plates
- Low dosage
- Reduces piling and misting
- Improves solid print areas
- Robust plate-protection package minimizes the potential for tinting and toning
