Varn® Newsline Green

High-performing, neutral fount with near-zero VOCs

Fountain Solution - Coldset Print Applications

Using the lowest-possible VOC content available*, Varn® Newsline Green doesn't sacrifice one iota of performance. Using the safest fount for your planet and your employees, you'll keep your coldset press clean and enjoy efficient ink emulsification, reduced misting, and improved solid lay. Newsline Green also offers enhanced plate desensitizing for improved re-starts, decreased possibility of tinting and toning, and minimized potential for microbial growth. In addition, the strong chelating package reduces ink build-up on gaps, rollers, and non-image areas of the plates and blankets, in turn reducing piling and linting.

Advantages of Varn® Newsline Green

- Eco-friendly—lowest VOC possible
- Reduces piling and misting; requires lower dosage
- Strong plate cleaning properties; can be used with no-chemical process plates
- Compatible with all coldset color inks; excellent results with Flint Group inks
